Education

Indian Institute of Technology, Guwahati, BTech

Nov 2020 – May 2024

- GPA: 6.93/10.0

A Success School, Higher Secondary School

June 2018 – May 2020

- GPA: 8.4/10.0

Experience

Software Developer, Practo Technology, Bangalore

June 2024 – present

- Developed and maintained backend services with **Java** and **Spring Boot**, and Working with **Microservice architecture**.
- Worked on extensively with **PostgreSQL**, designing, implementing, and **optimizing complex SQL queries** to greatly improve application performance and enhance the user experience. which solved many query **timeout issue** on the production.
- Implemented a feedback system using **AWS SQS** and **SNS** to notify patients via SMS and email after doctor appointments, enabling them to provide feedback. This system enhanced company **growth** and **outreach**.
- Built a **URL shortening** service that allows custom keywords for mapping long URLs, or auto-generates short URLs if no custom keyword is provided, also this service used by multiple other services in Practo.
- Worked on tools like **Graylog** and **Sentry** for logging, monitoring, and real-time analytics to ensure system scalability and reliability. also, took responsibility for **PagerDuty** for more than **three services**.

Software Developer, Exposys Data Labs, Remote

Jan 2023 – March 2023

- Worked on the development of an in-house video-conferencing application. Integrated **Socket.IO** into the application, enabling real-time **bidirectional** communication between the server and clients and Employing the PeerJs library for smooth **WebRTC** peer connections.
- Used **Node.js** and **Express.js** on the backend to manage server-side logic and API endpoints, enabling real-time communication between clients.
- Implemented several features like Send Emoji, Quick Message, Screen Share, Store Chat, Raise Hand using **Node.js**.

Projects

SwanShare | Blockchain Based File Sharing System

GitHub

- Designed a file management system employing **AES symmetric encryption** and **RSA asymmetric encryption** for file security. Utilized **IPFS** to facilitate **decentralized file storage**, enhancing data resilience and accessibility.
- Integrated **Web3Storage** as a gateway, enabling seamless uploading and retrieval of files on the **IPFS** network and Implemented **Socket.IO** for real-time connections and threading techniques to maintain active connections.
- Established a proprietary blockchain network to store and manage file content identifiers (**CIDs**), ensuring data integrity and traceability.

Audify

GitHub

- Devised a web app using **React** and **Node.js**, enabling users to create and organize customized audio collections.
- Accomplished seamless video-to-audio conversion with **FFmpeg** and automated caption generation using **Whisper**. and used **Firebase** services for streamlined data storage and secure user authentication.

GoFood : Online Food Ordering Web App

GitHub

- Developed a full-stack application using **MongoDB**, **Express**, **React.js**, and **Node.js** with secure user authentication via **JWT**, **bcrypt**, and Express validator.
- Optimized project functionality by integrating HTTP APIs and **WebSocket** for seamless, interactive features and real-time updates.

Technical Skills

Programming: C/C++, Python, Java, Javascript

Web Technology: HTML, CSS, JavaScript, ReactJs, ExpressJs

Miscellaneous: SpringBoot, SQL, Firebase, git, GitHub, MongoDB, Docker, Nginx
